EDUCATION

University of Edinburgh

Edinburgh, UK

MSc in Artificial Intelligence with Distinction (Highest Award)

Sep 2024 – Aug 2025

- **MSc Thesis:** How do Vision-Language Models Balance Reliance on Image and Text Across Languages? [PDF]
- **Research Project:** Towards A Data-Centric Approach for Marine Debris Object Detection [PDF]
- **Research Review:** Leveraging Auxiliary Languages for Low-resource Neural Machine Translation [PDF]

McGill University

Montreal, Canada

BSc in Mathematics and Computer Science, GPA: 3.73/4.0

Sep 2015 – May 2019

- **Awards:** Tomlinson Award for Mentoring (2017, 2018, 2019), Major Entrance Scholarship (2015)

EXPERIENCE

Got It AI

Hanoi, Vietnam (Remote US)

Machine Learning Research Engineer

Feb 2023 – May 2024

- Researched and fine-tuned customer service LLMs via knowledge distillation with PEFT/LoRA, significantly reducing model size while maintaining accuracy.
- Developed guardrail reasoning models for hallucination detection via multi-task training, improving recall by 21% and enhancing reliability of generative AI systems.
- Evaluated the latest LLMs (GPT, LLaMA, Mistral) on question-answering and hallucination detection tasks.
- Implemented an active learning loop to retrain models on user interactions, reducing errors by 2-5% per iteration.
- Collaborated with research and engineering teams to deploy AI systems into production using TensorRT-LLM.

Intact Insurance, Data Lab

Montreal, Canada

Data Scientist

Sep 2020 – Dec 2022

Data Scientist Intern

May – Aug 2020

- Led the training of domain-specific language models, improving F1-score in multiple NLP projects by up to 15%.
- Fine-tuned BERT models for text classification and named entity recognition with over 90% accuracy to analyze insurance claims.
- Researched and implemented a specialized stacking ensemble pipeline in Python to combine tree-based models for claim payment prediction.
- Developed a web interface for machine-assisted annotation and text mining for data scientists using NLP methods.

Dynamicly Inc.

Montreal, Canada

Data Scientist

Oct 2019 – Apr 2020

Data Scientist Intern

Jun – Sep 2020

- Designed and built a NLU system using spaCy and NLTK to power chatbots, outperforming Microsoft LUIS by 29% in accuracy.
- Collaborated with the engineering team to deploy the model as a server for multiple users using Django.
- Created analytics dashboards in Power BI to monitor model performance and extract user insights.

McGill University, DDMAL Lab

Montreal, Canada

Software Developer

May – Aug 2018

- Implemented various functionalities for a web-based image recognition software to parse music scores using Python and JavaScript.
- Analyzed runtime performance to identify bottlenecks and optimized certain functions by 75 to 90%.

SKILLS

Programming: Python, Java, Bash, SQL (Postgres), JavaScript, HTML/CSS

Libraries: PyTorch, HuggingFace, Scikit-Learn, OpenAI, PEFT, Pandas, Numpy, OpenCV, Ultralytics, Matplotlib

Tools: Git, Jupyter, GCP, CUDA, Docker, WandB, MLflow, Power BI

Specialties: Language Modeling, LLM Fine-tuning, Multilingual AI, Vision-Language Models

Languages: English (fluent), Vietnamese (fluent), French (intermediate)
